

In upgrading our catalog to a full color format, we have made every effort to accurately reproduce the glass color. However, we did find that some colors are more difficult to photograph than others.

The colors on these pages do not necessarily represent the **exact** color of the glass. We encourage you to use your sample boxes or send us a sample to match when an exact color is needed for your project. Remember, most of the glass is handmade and may vary in color, density, etc. from batch to batch.

Sheet sizes and cut sizes are all approximate. We cannot offer exact cuts.
